

# Save time and money on monitoring and communication with iConnect

**Do you want to cut down on the time your staff spend filling in daily observation sheets, accident reports or tracker reports? And do you want them to spend more time helping the children in your care to progress?**

iConnect Daily offers a simple solution to busy nursery staff who currently spend much of their day manually recording important information such as nappy changes, meals, sleep times and accidents.

**The beauty of iConnect is that it can be used as a stand alone product or integrated into ConnectChildcare.**

## Innovative technology

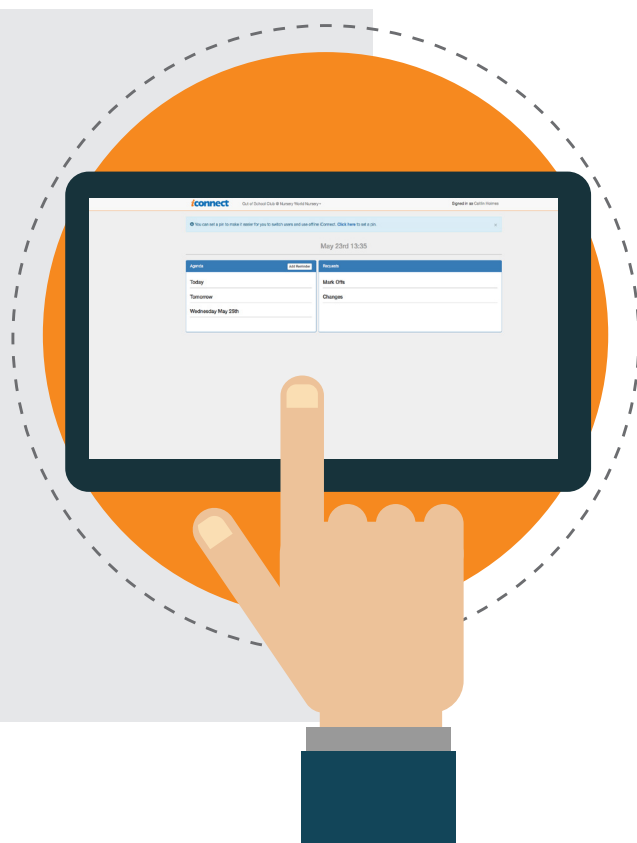

Using the latest touchscreen technologies such as tablets and touchscreen PCs, iConnect Daily provides a gateway for nursery staff to view key room and child profile information on handy touchscreens in each room and for observations to be recorded with ease.

These touchscreens can also give busy nursery staff an overview of upcoming events, child attendance, new starters, staff absence, birthdays and much more.

And better still; the information is displayed in a very user friendly way to ensure that key information is available with ease and at the touch of a button.

The Government has made a number of attempts to computerise the process of legislative monitoring to enable multiple agencies to access key foundation stage observations.

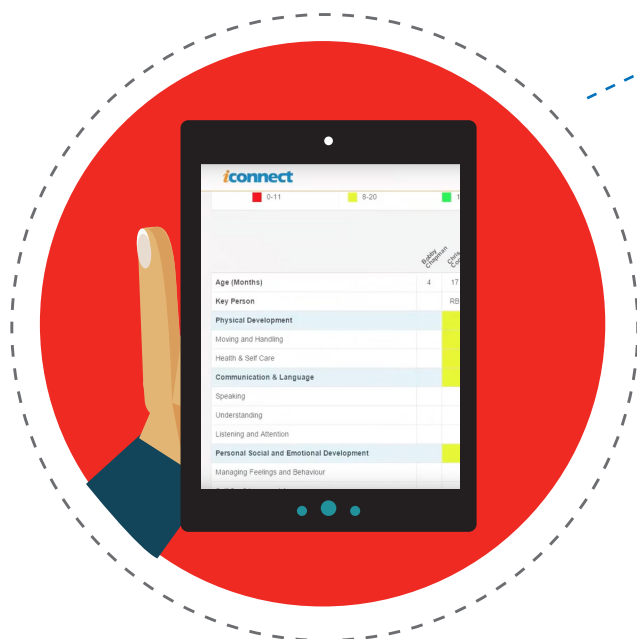

With iConnect you can rest assured that your data is completely secure. For current parents and staff, there is a secure login area, accessed via the homepage. The secure login area, which is protected in the same way as online banking using SSL Certificate enabled encryption, allows parents and staff to have a two-way conversation and view photos of children taking part in activities.

## How can iConnect help?

iConnect enables the assessment of foundation stage frameworks and Characteristics of Effective Learning to take place using the latest in tablet and touchscreen technologies.

All observations are captured in real-time and are stored centrally ready for analysis. Photographic, video and audio evidence can also be captured and linked to frameworks. Parents could therefore see a video of their child's first steps or first word, meaning they don't miss out on important milestones whilst working.

## Spend more time with the children in your care

Your staff will need to spend less time preparing children's learning journeys which enables them to spend more time helping them to progress; you will also be able to easily prepare tracker reports in line with current government legislation. This will enable you to quickly spot a child's learning gaps and take steps to help them develop.

In addition to foundation stage monitoring, daily observations can be stored on the in-room monitor ensuring accidents, meals, sleeps and nappy information are again stored centrally, and ready to print out in daily parent reports or better still, uploaded on the ParentZone app so that parents can access information about their child's day whenever they want to in a Facebook style timeline.

“ We absolutely love iConnect and so do the parents we work with. Parents especially love the Day in the Life reports because they include lots of pictures. Our staff love producing them too because they are so easy to prepare! This is definitely one of our nursery's unique selling points. ”

Amy Greenall, Little Blossoms of Barrowford

### Key Features

- ✓ Electronic registers and muster reports
- ✓ Meals, sleep times & nappy changes
- ✓ Accident recording
- ✓ 'Day in the Life' reports
- ✓ Supports multiple frameworks including EYFS 2012 and characteristics of effective learning & pre-birth to 3
- ✓ 3 observation stages - quick, advanced, published
- ✓ Comprehensive tracker reports can be filtered by cohort, gender, ethnicity, EAL, ages for better short term planning
- ✓ ParentZone App
- ✓ Reduced printing costs
