

Firework code

A firework code is a list of safety tips that you can display at your setting, to promote the safe use of fireworks.

Why not use a firework code in your setting and share it with parents?

Remember to tailor the firework code to your setting's families. For example, you could include that some children may be frightened of the fireworks, and that if they have sensitive hearing, children could wear ear defenders.

Your local fire service may also provide one on their website a firework code.
