

Please support our private and voluntary nurseries across England

National Insurance Contributions and increased minimum wages will hit nurseries hard:

Nursery staff costs 75%

Restaurant staff costs 30%

This will add **£2,600** per employee or **£47,000** for an average nursery:

£2,600 a year per employee*

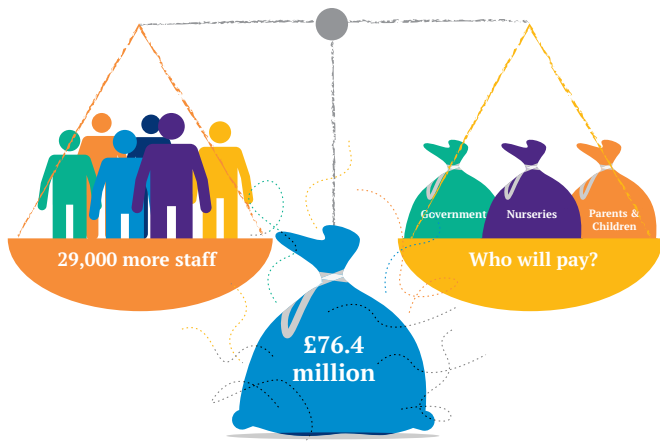

£47,000 a year for the average nursery*

11% increase to staff costs

*based National Living Wage increases and 18 staff members

Government funding will not cover these costs – so who will pay? Underfunding will lead to higher parent fees and fewer nursery places.
